**The Bio Nebraska Life Sciences Association** is leading Nebraska's bioscience and medical technology industry. Plug into the state's growing life sciences economy and experience the Advantage...and the benefits. More than 90% of Nebraska's employment in the bioscience and medical technologies industry is engaged in the production of products.

Benefit from Nebraska's high standard of work ethic, a workforce with a flare for technology, and the Nebraska Advantage tax incentive program, which allows for low cost profitable operations. Internationally known companies, such as *Novartis*, *Teledyne Isco*, *Pfizer*, *Novozymes*, *MDS Pharma Services*, *Schering-Plough Animal Health*, *3M Corporation*, and *Becton Dickinson Inc.*, have seen the Nebraska Advantage...and have continued to expand their businesses in the state.

# Nebraska Bioscience and Medical Technologies

[Nebraska's bio-products producers have a major advantage]

## Nebraska offers a research and development tax credit, tax incentives... and a business relationship with some of Nebraska's cutting edge bioscience centers, institutes, and programs!

- The University of Nebraska-Lincoln's \$24 million Chemical Engineering Complex is largely dedicated to bio-processing, including a cGMP pilot fermentation plant for Phase I/II clinical materials.
- In Lincoln, the George W. Beadle Center for Genetics and Biomaterials Research, is a \$32 million, 140,000 sq. ft. facility located on UNL's main campus. The center also houses the UNL Center for Biotechnology, the Nebraska Center for Virology, the Redox Biology Institute. Cooperative UNL/UNMC research programs are focused on the development of new technologies and technology spin-off companies.
- The University of Nebraska Medical Center and Eppley Cancer Center are leaders in medical research. The centers of excellence are: Cancer • Transplantation biology • Cardiovascular disease • Genetics • Neuroscience • Advanced biomedical technology • Biosecurity and bio-preparedness • Nanomedicine. Researchers are housed in the Durham Research Center, an ultra-modern 10-level, \$77 million facility, complete with 116 research laboratories. A second research facility of equal size opened in January 2009.
- Omaha's Scott Technology Center provides a wide array of specialized services that high technology companies require, including access to advice from business leaders in the Omaha area, in-house consulting, partnership development with the nearby Peter Kiewit Institute, financing referrals, and marketing and public relations assistance... all in an established turnkey business environment.
- UNeMed, the commercialization subsidiary of the University of Nebraska Medical Center, handles traditional intellectual property out-licensing as well as licensing to UNMC spin-off companies.
- Creighton University at Omaha has extensive core facilities related to flow cytometry, confocal microscopy and morphology, and molecular biotechnology. The facilities are available to both academia and industry.
